INTERNATIONAL SEARCH REPORT

International Application No.

PCT/JP03/07173

Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:

because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claims Nos.:

because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:

because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

Although claims 1 to 12 each relates to a patch composed of a substrate made of a polyester-based film and a drug-containing pressure-sensitive adhesive layer laminated thereon, such patches had been commonly employed and, therefore, cannot be considered as "a special technical feature" as defined in PCT Rule 13.2.

The "special technical feature" of claim 1 and parts of claims 3 to 12 resides in that the surface roughness of the polyester-based film surface in the side being in contact with the pressure-sensitive adhesive layer is from 0.05 to 0.8 μmRa .

The "special technical feature" of claim (continued to extra sheet)

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☒ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest ☐ The additional search fees were accompanied by the applicant's protest.

☐ No protest accompanied the payment of additional search fees.

Continuation of Box No.II of continuation of first sheet(1)

2 and parts of claims 3 to 12 resides in that the surface of the polyester-based film in the side being in contact with the pressure-sensitive adhesive layer has been sandblasted.

Such being the case, it does not appear that there is a technical relationship between these groups of inventions involving one or more of the same or corresponding special technical features and, therefore, these groups of inventions are not considered as relating to a group of inventions so linked as to form a single general inventive concept.
